

Louis Y. Ungar is president of A.T.E. Solutions, Inc., a leading independent test and testability consulting and educational firm. He has taught ATE and testability courses at UCLA and throughout industry. Ungar is a consultant and life time member to The American Society of Test Engineers (ASTE), has served as Testability Chair for the Surface Mount Technology Association (SMTA) developing the SMTA Testability Guidelines. He has served on committees for various IEEE standards. He is active with various test and measurement groups, including AutoTestCon, IPC, and Measurement Science Conference. He holds patents for Built-In Self Test circuits. He has authored a number of articles on Design for Testability (DFT), Built-In Self Test and economic models of both. He has consulted dozens of organization on how to improve the testability of their circuits. He and his company have developed Test Economics tools and DFT tools, including The Test Flow Simulator™ and The Testability Director™. He is Editor-in-Chief of The BestTest Newsletter, an internet based publication. Ungar holds a B.S.E.E. and computer science degrees from the University of California at Los Angeles (UCLA) and has completed his course work toward an M.A. in Management.
